

## User Opinions

The easiest way to find, what is Sort Photos Now - is to hear, what other users tell about it.

Here are some short reviews, sent to us by people, who already use Sort Photos: "I had several hard drives full of different picture cameras in the different years. I am picturejournalist and travel around the world with my picture cameras. In the past all photos were made on photographic films and are stored, being printed on the paper. Today I use digital picture cameras with high resolution, such as Nikon TX Extra. I stored all my photos on my notebook and several mobile hard drives. Finally, all photos mixed up and I even could not find photos from my last trip to Burma. I even did not know, what to do. But my colleague advised me to use Sort Photos. I installed it and it sorted all photos, that I had directly as I wanted (by camera model and date, when picture was made). I even did not supposed, that such clever picture organizers exist. Sort Photos Now saved very many of my time - all my photos are now in the ideal order. Sort Photos Now - is a program, which really helps people to sort their picture collection easily."

Greg List, picturejournalist of newspaper "New York Times" "Hello! My name is Amanda Carole I really love taking photos of my family. My collection of photos is very large. At that time I did not used any program to sort photos, I sorted my photos manually. A year ago, I simply did not understood, why I should use picture sorter and I did not had any problems. But one day (this happened during the summer) we decided to celebrate adulthood my eldest son, he was 21 years old. I wanted to make him a gift - to show photos of his distant childhood. I wanted to show how he made his first step in life, how he went to school at the first time. But at that time my computer had not picture sorter installed, I had to spend a lot of time to manually sort photos without Sort Photos, find all necessary photographs. All evening was finally mutilated. By advice of my friend, I installed on my computer Sort Photos, which currently sort all photos for me. Now, when I am making family photographs, I am confident that with help of Sort Photos all my photos will be sorted very easily. I am very glad, that I found such easy to use and comfortable picture sorter as Sort Photos."

Amanda Carole, householder from Columbia, LA "In our office periodically is collected variety of documents scans in electronic form - they are needed for statistics gathering. Every Friday i create consolidated report, based on information, gathered from them. Day by day, month by month office documents scans (their photos), collected on our picture server, their quantity increased and increased, and to work with them became harder and harder. One Friday I could not find one document scan, needed for weekly report, and spent weekends in the office, sorting all document scans by author and department, where they were created. Already was Monday, but report was still was not ready. Engineers from technical department installed, to help me, a special program for images and document scans sorting. It sorted all document scans in minutes, directly as I want - first part by date, second part by size, and third part by author. Needed documents scans were found and from that time my work became much easier - Thanks a lot to Sort Photos Now creators team."

Michael Werner, office manager of "American Airlines" "I am working in archive department of large production company. On our servers large amount of photos are stored in archived state. We receive them daily and we needed, before appending to common storage, manually open every archive file, view it's content and rename it, according to photos and document scans, located in it. All was OK, but after extending of company production level we became to get more and more archived document scans and photos for processing. Finally, leaving on the work until late at night. To solve this problem was installed Sort Photos Now and now it do all itself. Very powerful program - how we could be without it?"

Nikolas Flatley, director of archive department in "D&D" production company

"Our department store all non-private picture files, transmitted over satellite network. Every day we receive millions of new photos. All this images must be somehow sorted, so any of our clients could easily find among that photos what he need. We tried all picture sorting tools, presented on market - and chosen Sort Photos. Why? Extremely flexible settings. We set up different processing rules for photos with differenet content and properties. No one program can do it today. "

Victor Acosta, chief engineer of Sony Corp. data processing center That's what users say about Sort Photos. We hope, that it will be useful for you too.
